

	Utah Department of Health	Reporting Period: 2007- 2008				Date of This Report: 2/1/2008		
1-DRUG OVERDOSE/PAIN MANAGEMENT INITIATIVE - Erin Johnson								
Establish a two-year program in the Department to reduce deaths and other harm from prescription opiates utilized for chronic pain. (HB 137)								
GOAL	METRIC	STATUS	TREND	TARGET	CURRENT	PREVIOUS	FREQUENCY	METRIC DEFINITION
1,2	Customer							
	Effective coalition process		➡	80%	100%	100%	quarterly	% of targeted groups met with (DOPL, Epi, Victim, Substance Abuse, Utah Medical Association, Insurers
	Financial							
	Adequate funding		➡	\$500,000	\$500,000	\$500,000	annually	appropriated budget and partner contributions
	Health Outcome							
	Rate of unintended overdose deaths associated with prescribable opioid medications		⬆	7	8	8	annually	annual rate per 100,000 population of deaths attributed to overdose death with manner of death either unintentional or intent not determined associated with prescribable opioid medications as classified by the Office of Medical Examiner
	Number of unintended overdose deaths		s/b down	2	Not yet available		quarterly	number of reported deaths (current) compared to the same time period (previous) in the previous year

*Note: The number of unintended overdose deaths may require several months before we have completed reports for parts of 2007. The ME has reports ready up through September, but there are still too many "pending" cases on the 2007 records for this to be meaningful as an indicator. (1/3 of the July ME reports are still pending.)
